

n8n Automation for UK Financial Services

How London fintechs replace £150K/year iPaaS contracts with self-hosted n8n in eu-west-2.

The iPaaS problem in London

Workato/MuleSoft/Boomi often exceed £150K/year. n8n self-hosted on AWS London costs under £8K/year for the same throughput.

FCA-friendly architecture

- Self-host in eu-west-2
- Audit logs to S3 with object lock for SYSC 9.1.1
- Encrypted credentials in AWS Secrets Manager
- PII detection on every webhook ingress

Manchester payments firm: replaced Workato in 11 weeks. Annual saving £142K. Engineering velocity tripled.
