

# Building Multi-Tenant SaaS for the Australian Market

*Sydney, Melbourne and Brisbane SaaS founders: architecting for IRAP, the Privacy Act and ap-southeast-2.*

---

## Architecture decisions that matter

- Region pinning (ap-southeast-2 / ap-southeast-4)
- Tenant isolation: schema-per-tenant for finance/health, shared schema for SMB
- 72-hour OAIC notifiable-breach response built into runbooks
- ATO STP Phase 2 compliance for any payroll touchpoint

## Why Australian founders hire AI Pinnacle

AUD billing, AEST-overlapping hours, IRAP-aligned platforms shipped since 2019, zero App Store / Google Play AU rejections.
